# EDUCATION

Rajkiya Engineering College, Ambedkar Nagar, India

CGPA - 7.67

Bachelor of Technology in Information Technology

Aug 2019 - June 2023

Ratan Sen Inter College, India

Percentage -80.2

Intermediate (Class XII)

May 2017

Sardar Patel Rashtriya Inter College, India

Percentage - 87

High School (Class X)

May 2015

# PROJECTS

**Shopie** | Project (https://shopie-e.herokuapp.com/) | Source Code

Apr 2022

- Developed an E-commerce web application Shopie. using MERN stack.
- This website includes features like **register** and **login**, **search** and **filter**, product **rating** and **review**, easy **checkout** and **payment**, **navigation**, dashboard **access for admin** to **create** and **delete** product, **view all products**, **users**, **reviews**, **orders** etc.
- Used **chart.js** and **reactchart.js** in admin dashboard to keep track of Instock and Outstock poduct's count and to track total amount worth product sold.
- Used **jsonwebtoken** for authentication and **Nodemailer** for token generation and to reset password by Email and **stripe** for payment functionality.
- Used @mui, axios, overlay-navbar, react-js-pagination, react-redux, react-hooks in frontend.

Reciter | Project (https://reciter.netlify.app/) | Source Code

Mar 2022

- Built Reciter, a News reader web application using React.js.
- An application which can search news, read headlines for you and navigate on voice command. it can also talk and answer of logical and funny questions.
- Used **Alan AI** voice assistant which implements Natural Language Processing and **newsapi.ors's** api to get latest News.

Codetogether | Project (https://code-to-gether.herokuapp.com/) | Source Code

Feb 2022

- Developed codetogether web application using React.js. and socket.io
- This is **real time code editor** which **can sync code among multiple users**. In this application, one can create room and multiple users can connect with same room using the room ID which can be copied from **Copy Room**ID button of editor page and a user can also leave room as well.
- Used express.js and socket.io to create server and room and socket.io-client to connect client.
- Used **uuid** to create unique room id and **react-hot-toast** for alert message.

#### ACHIEVEMENTS

- Solved 250+ questions on Leetcode. -Leetcode Profile
- 3-star rating on Codechef Codechef Profile
- Ranked 81 out of 21400 participants in Codechef October Challenge 2021 Division 3.
- Cleared Qualifier round of **SnackDown 2021** *Certificate*
- Ranked 488 out of 4714 participants in C.O.D.E.R.S. Contest at CodeChef.

### TECHNICAL SKILLS

Languages: C, C++, JavaScript

Web Development: HTML5, CSS, React.js, Express.js, Node.js General: Data Structures and Algorithms (Certificate), OOPs in C++.

Database: MongoDB

# Relevent Coursework

• Web Development(MERN) • Operating System • DBMS • Computer Networks
